Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Eitel et al.

Eitel et al. teaches a device for transporting sheets to a sheet processing machine, comprising: a feed table, 1, defining suction regions, 13-16, of different pressure levels, to be produced by a suction source, 17, the regions disposed one beyond the other in a direction of transport, the feed table having suction openings, 2, and ventilation openings, 21 through 24, formed therein, see column 2, lines 30+; and suction belts, 4, for endlessly revolving over the feed table, the suction belt to be acted upon by the pressure levels, the suction belt having through openings, 7, formed therein; the suction openings and ventilations opening correspond with the through openings in the belt. The second region, see figure 1, includes the suction and ventilation openings, and suction boxes disposed in parallel in edge regions of a suction belt, see figure 2. The suction regions include an end suction region and a rotary valve, 20, which connects the end suction box to the single vacuum source.

Allowable Subject Matter

Art Unit: 3653

Claims 4-6, and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 9 is allowed.

Response to Arguments

Applicant's arguments with respect to claims 1-3 and 7 have been considered but are moot in view of the new ground(s) of rejection.

The examiner reviewed the applicant's arguments with respect to the Eitel et al. reference and determined that the examiner's original rejection misinterpreted the reference. The reference does in fact teach ventilation openings that correspond with the through openings in a suction belt, however those openings are indicated in the figures by reference numbers 21-24, not numbers 61 and 62, as originally argued. Therefore, the Eitel et al. reference does teach the applicant's invention, as claimed in claims 1-3 and 7.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kaitlin S. Joerger whose telephone number is 571-272-6938. The examiner can normally be reached on Monday - Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Mackey can be reached on 571-272-6916. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
